

Small Business Initiative

At **Brandish Creative** we have a lot of respect and heart for small business. That's why we're excited to now offer **Easy Sites** to our small business clients. We build it, we host it and then give you the tools to maintain and update whenever you need.

>>> **Easy Site \$1,650**

(One time fee, includes free hosting for 1 year. Hosting after 1st year is just \$25 per month.)

If you're not on the web, or have an outdated site, you may be losing business to competitors without even knowing it.

You can be up on the web with a professional, attractive, fully functional and easy-to-manage website in as little as 3 days.

We will create a customized one-page website using your logo with any combination powerful features listed on the right side of this page.

Your site will be accessible on tablets & phones. This is extremely important as more and more people access the web while on the go.

All you will need to provide is a one-page description of your business along with the types of customers you hope to attract.

Our experienced Madison Avenue creative team will quickly turn the description into copy that is appropriate for the web and organize your content to set you up for success.

Easy Site Features Include:

- Directions and Maps
- Your hours of operation
- List of your services and/or products
- Contact Forms
- Newsletter opt-in for visitors
- Photos and Photo Galleries
- Videos from YouTube or Vimeo
- Documents your visitors can download
- Links to Facebook, Twitter, Pinterest...
- Analytics of your site's performance
- Easy Ecommerce... sell something

We will advise you as to which features are best suited for you. Remember, sometimes less is more. You shouldn't feel compelled to utilize all of them.

If you already own a web address (also known as a URL) we can utilize it. If you don't already have a URL, we can help secure one for you.
